## **DETAILED ACTION**

1. This office action is in response to application 10/677,154 and Amendment filed on 08/01/2005. Claims 1 and 15 have been amended by including additional limitations. Claims 2 and 16 have been canceled, claims 23-24 are newly added. Claims 1, 3-15 and 17-24 remain pending in the application.

### ***Allowable Subject Matter***

2. Claims 1, 3-15 and 17-24 are allowed over prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest or render obvious:

A method for making optical proximity corrections to a reticle layout topology, comprising generating a plurality of individual figure of merit values each of which are associated with the corrected reticle layout and correspond to a different process metric, generating a generalized figure of merit (GFOM) using the plurality of individual figure of merit values, and manipulating the edge segments of the corrected reticle layout to arrive at a revised corrected reticle layout using OPC guided by the GFOM as a convergence benchmark that indicates a degree of optimization of local critical dimension (CD) accuracy.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
